*Int. J. Pres. Ves. & Piping* **37** (1989) 389–391

# CONTENTS OF VOLUME 37

*Numbers 1–4*

**Special Issue on Design Codes and Structural Mechanics**

Preface . . . . . v

List of Contributors . . . . . xi

SESSION I—DEVELOPMENTS OF DESIGN CODES

What's New in Design Requirements in the 1986 Edition and 1986 Addenda of Section III, Div. 1, of the ASME Boiler and Pressure Vessel Code? . . . . 3
J. R. FARR (USA)

The Regulator's Role in Code Development . . . . . 17
T. CURRIE (UK)

Practical Procedure for Stress Classification . . . . . 27
R. L. ROCHE (France)

Some Problems in Analytical Design . . . . . 45
GU FANGYU (People's Republic of China)

Interim Structural Design Criteria for Fusion Reactor Components . . . . 53
E. ZOLTI (FRG)

Current and Planned Activities at the PVRC in Support of Elevated Temperature Design Technology . . . . . 67
D. H. PAI (USA)

SESSION II—ELEVATED TEMPERATURE DESIGN RULES

Some Notes on the Structural Design Code for FBR Components . . . . 83
H. WADA & M. TASHIMO (Japan)

Recent Italian Research and Development of the High Temperature Design Method . . . . . 93
F. CORSI (Italy)

Development of Design Procedures for Fast Reactors in the United Kingdom . 99
R. T. ROSE, B. TOMKINS & C. H. A. TOWNLEY (UK)

*Int. J. Pres. Ves. & Piping* (**37**) (1989)—© 1989 Elsevier Science Publishers Ltd, England.
Printed in Great Britain

German Codes and Standards for Nuclear Power Plant Components, Recent KTA Activities for Advanced Reactor Types . . . . . 113
K. BIENIUSSA, J. FREUND & H. RECK (FRG)

European R & D Co-ordinate Programme on Structural Integrity of Fast Breeder Reactors . . . . . 127
A. HOFFMANN, A. COMBESCURE, D. ACKER (France),
C. H. A. TOWNLEY, B. TOMKINS (UK),
F. CORSI, A. MARTELLI (Italy),
K. VINZENS & A. ANGERBAUER (FRG)

Development of Procedures for the Assessment of Defects at Elevated Temperature 141
R. A. AINSWORTH & I. W. GOODALL (UK)

SESSION III—FATIGUE ANALYSIS AND LIFE ESTIMATION

Simplified Elastoplastic Fatigue Analysis . . . . . 157
B. AUTRUSSON, D. ACKER & A. HOFFMANN (France)

Derivation of Design Curves for the Elevated Temperature Fatigue Endurance of Type 316 Stainless Steel . . . . . 171
D. S. WOOD, J. WYNN & K. WILLIAMSON (UK)

Code Aspects of Life Extension . . . . . 189
P. P. RAJU (USA)

Code Rules for Fatigue Analysis of Crack-like Discontinuities and Small Cracks 201
R. L. ROCHE (France)

SESSION IV—COMPONENTS AND PIPING

Appraisal of Elastic Follow-up for a Generic Mechanical Structure through Two Simplified Methods . . . . . 221
S. GAMBONI, C. RAVERA, A. REBORA & G. STRETTI (Italy)

Recent Experimental Research into Buckling Design Methods for FBR Components. . . . . 243
T. YUHARA & M. TASHIMO (Japan)

Class 2 Piping Rules in Elevated Temperature Applications Compared with Class 1 Prescriptions for LMFBRs . . . . . 263
R. CAPELLO, F. G. CESARI & G. STRETTI (Italy)

Critical Examination of Valve Design According to Sub-Section B 3500 of the French Design and Construction Rules for Mechanical Components of PWR Nuclear Islands (RCCM January 1985 Edition) . . . . . 279
J. HUET, J. F. DABROWSKI, N. MAURIN &
M. QUERE (France)

Index . . . . . 301

*Number 5*

Ram Bending of a Cylindrical Pipe in the Elastic Range . . . . . 307
D. REDEKOP & P. AZAR (Canada)

The Effect of the Various System Stresses on the Integrity of a Cracked Piping System . . . . . 321
E. SMITH (UK)

A Study of Effective Stress Range Ratio in Programmed Loadings . . . 331
RAGHUVIR KUMAR & S. B. L. GARG (India)

Radial Loading of a Cylindrical Vessel Through a Rectangular Rigid Attachment 345
ALWYN S. TOOTH & FAISAL A. MOTASHAR (UK)

Effect of Hydrogen Attack on Tensile and Creep Properties of Low Carbon Steel 365
KIYOSHI YOKOGAWA, SEIJI FUKUYAMA,
KIYOKATSU KUDO (Japan) & PAUL G. SHEWMON (USA)

Announcement . . . . . 387
